

AutoLab - Next Automation GmbH is a young company based in Graz, Austria, which offers technical solutions in the field of automation and control engineering. Our services range from mechatronic concept development, machine vision, PLC and industrial PC programming, control design/implementation and industrial data analysis. In order to offer our customers the best possible support, we rely on modern and up-to-date software development. To support our team we are currently looking for a qualified:

Software Developer in Industrial Automation (38,5 h)

Your Profile

- Completed technical education (HTL, FH, University or similar) in the field of SW development, computer science, automation technology or similar.
- Experience with hardware-related programming, embedded systems, microcontrollers or PLCs
- Advantageous: Experience with OOP, C++ or Structured Text
- Strong analytical skills and accuracy

Your Tasks

- Collaboration in development and programming of software modules
- Support during commissioning, problem analysis and troubleshooting
- Further development and improvement of existing solutions
- Integration of various real-time system components (e.g. magnetically driven movers, 3D sensors, 6-axis robots)
- Use of existing tools for version management (Git)

We offer

- Focus on individual strengths and interests to find the optimal work areas for each person. We are looking for people, not resumes!
- Exciting activities in a young and motivated team.
- Really flat structures and hierarchies
- Willingness to embrace technical trends, instead of "same old same old"
- Office and roof terrace in the heart of Graz
- Flexible working hours and home office
- Monthly gross salary from 3 600€, adaptable depending on qualifications

We are looking forward to your application!
